

DIY STRONGER LIGHTER FASTER

"I became familiar with Ben's rigging and splicing work when we worked together on a sailboat in 2016. I have been using his endless loop friction cords and slings since he developed them in my work as a climbing arborist. They are invaluable tools in my kit that I rely on daily."

~Sean O'Brien
Hustle Tree Care
ISA Certified Arborist

"Modern Splicing is going to be my new go to reference for splicing. Just like Ben is my go to for all things rigging. Whenever a colleague has a complicated rigging problem, I send them to Ben for an elegant solution. Ben is a great shipmate in all weather but when it gets rough, he is the person you want around. Having all of these methods collected in one book with such clear diagrams and easy instructions is exciting. I wish I had this book when I was learning to splice. I will be keeping a copy of Modern Splicing in my seabag"

~Captain Kevin Murray, 1600-Ton Oceans
Master w/ Sailing Endorsement
Master of SSV Robert C. Seamans

"The rigging Ben spliced for our Northwest Passage transit is still in good order six thousand miles later as we sail toward the tropics and another big ocean crossing. I have many worries on my mind, but Ben's work is not among them."

~Mark Synnott
